

# Simplify legal analysis with aosphere

ISDA members can request a free trial of netalytics, CSAnalytics and diligence. Each ISDA member organisation can select two jurisdictions from each service for up to three months.

Request a free trial: <https://form.jotformeu.com/aosphere/isdafree-trial> or contact [info@aosphere.com](mailto:info@aosphere.com)

## netalytics/CSAnalytics

The ISDA opinions examine the enforceability of netting and collateral arrangements in the event of insolvency of a counterparty across a range of jurisdictions. aosphere extracts data from the opinions and presents an online report, updated annually.

Each report is traffic light colour coded and details problematic counterparty/transaction types in each jurisdiction.

Subscribers have unlimited access across their organisation. This means the information can be accessed in any location at any time on a standardised basis.

## diligence

Industry netting and collateral opinions assume your counterparty has capacity to enter into derivatives transactions, but do they? diligence uses specifically commissioned memoranda of law to analyse a range of pre-trade due diligence issues for a wide range of counterparty types.

## diligence ISDA e-contracts

This service analyses ISDA's e-contract opinions and allows users to rapidly view factors relating to the use of electronic contracts, e-signatures and click-through agreements across derivatives transactions in an intuitive colour-coded web format, including enforceability and admissibility of electronic records in court proceedings.
